

WORLD LATEST NEWS.

Before daylight yesterday morning a large number of armed men, Lincoln soldiers, were marched through town to the ferry landing, a signal given which was answered from the other shore, and the ferry boat was sent over to them. They were taken aboard and went to camp Joe Holt, we suppose. What do these midnight movements mean? It bodes no good to the integrity and peace of Kentucky.

Mike Sweeney, a young man, was arrested by Officer Sweeney for maliciously shooting at another young man. He luckily missed his aim, and was only held for \$200 bail to answer a misdemeanor. He had two pistols in his possession, and is already under indictment for a similar offense.

All the Lincoln papers North are still crowing over the capture of the little sand fort at Hatteras Inlet, asserting that they have secured a foot hold in North Carolina. They want to tell the truth to their readers, or let them know that said foot hold is some forty miles from North Carolina.

We learn that the 14th North Carolina Regiment (including the Cumberland Fought) have started on a march, on foot, of 160 miles, to join General Lee in Western Virginia.

A farmer living in central Kentucky, a very enthusiastic Southerner, raised a large flag on his premises last week and the same evening his wife presented him with a *vineyard*.

The Glasgow Free Press says that never in the memory of the oldest inhabitant has there been such crops of corn in this country as there will be this season.

We learn that the story that a man of the name of Cartwright, from Charleston, Ind., had been arrested at Cincinnati with \$700 worth of pistols for the South, is all a rorback.

\$1,000 Kentucky sales held at New York on Thursday at 7 1/2 cents.

From the Memphis Appeal we take the brief notice of the gallant Gen. Johnston, who is now at Richmond. He is a Kentuckian.

General Albert Sidney Johnston.

Editor Appeal: Passing up this morning on the Mississippi Central Railroad, I fell in with this distinguished General. At an early hour I was introduced to him by a friend from Yazoo who, together with the General, were en route to Richmond. I found him quite agreeable and communicative, especially considering that he was a prisoner of war.

Gen. Johnston is tall and straight, and weighs about one hundred and sixty pounds. He has been reduced since the Mexican war in weight about twenty pounds (so says my gallant friend Gen. Bradford). He has firmness and intelligence marked in every lineament of his countenance, and his bearing is that of a soldier and a gentleman—exceedingly modest, but with a modesty that speaks his merit.

It was soon "noised about" that Gen. Johnston was the case, and at Washington—although before breakfast—a pretty fair crowd had collected; who, together with the Grenada Rifles and other soldiers, taken on at Grenada and elsewhere, made for the call in a few well timed and appropriate remarks, which were received with rounds of applause. The enthusiastic and patriotic Robert McDowall, Jr., assured the General that he was welcome to the Southern States, and the country was sure he would do his duty, and that if our men now in the field failed to whip the traitors, that the women and boys would take up the fight and complete the job. The General promptly replied "that the enemy had caught the idea they had already commenced the arrest and imprisonment of our women to prevent them from engaging in the fight."

At Holly Springs, a goodly number of persons were in attendance—they found out by some means or other that Gen. Johnston was aboard. He was again called out by the patriotic children of the "City of Flowers," and made them a plain, sensible talk, and was heartily and enthusiastically cheered.

At Grand Junction everybody seemed desirous of seeing and shaking hands with the gallant General. Gen. Johnston breathes the spirit of a freeman. He speaks of the violation of the Constitution and the usurpation of power by Lincoln and his minions, and declared that the last resting place of constitutional liberty was in the Southern States. That every freeman should be willing to make a sacrifice of himself and his all for liberty as contended for by the South, in this hour of trial and peril, and as for himself he was ready to render such service as he could and to make the sacrifice required of him.

Letter from Cumberland Gap.

(From the Cincinnati Gazette.)
THREE MILES FROM CUMBERLAND GAP, September 3.

Since my last letter there has been much change in the military situation in this section. There is now at Cumberland Gap about 1,000 Rebel troops, all infantry. The cavalry are down at Big Creek, where they number fourteen companies. There are at the same place seven or eight hundred infantry. It is rumored here today that a portion of the cavalry is under orders to march to Cumberland Gap.

Fifteen wagon loads of provisions were received by the Rebels at the Gap to-day. A Mississippian was engaged by the Rebels to tow a tow boat from the Gap, being the nearest point on the railroad, which was said to be coming this way; but I learn to-day that the Rebels are not so sure of the expediency of the move is not so clear to them as it was at first.

There are now four regiments in Knoxville awaiting orders.

There is a good deal of talk among the Rebels about invading Kentucky. They have the will undoubtedly, but the expediency of the move is not so clear to them as it was at first. They are now waiting for orders.

AUCTION NOTICE!

CHANGE OF BUSINESS!

S. ROTHCHILD,

On Market Street, between Second and Third.

WOULD announce to the citizens of Louisville and vicinity, that he has purchased a large stock of goods, and is now opening a new store at the corner of Third and Main Streets, between Second and Third.

He has a large stock of goods, and is now opening a new store at the corner of Third and Main Streets, between Second and Third.

WORLD LATEST NEWS.

(From the Philadelphia Inquirer.)
Northern Information from Richmond.

We yesterday had an interview with a well known Philadelphia, who, within a day or two, has returned from Richmond and Norfolk, and from him gleaned some very interesting information.

The Richmond Fair Grounds are occupied as the principal receiving depot for troops, where rarely less than from five to ten thousand men are concentrated.

African Americans are into great numbers, comprising some 15,000 men. These men, and our informant states, all who have passed through Richmond, are well armed, equipped, and inured.

There are no intrenchments worthy of mention in or around the city, and with the exception of fifty or seventy men, belonging to the "Richmond Howitzers," camped on the Hospital grounds, there are but few pieces of artillery. The Treadgar from the forts are turning out to be of little use in a war, and experiments are made with them daily. The e are between two and three hundred thousand men in the city, and it is said that Virginia can send to the seat of war at any time 150,000 men.

The soldiers are promptly paid. Our informant laughs at the idea that any suffering from the lack of provisions, and says the new crop, combined with the stock on hand, will suffice to last the South two years, the corn never having been more abundant than during the present year.

James River is well protected with batteries, from City Point to its mouth. Not long since a rumor was circulated that five Federal steamers were at the mouth of the river, and coming up to attack Richmond. Not only was the rumor excited, but it was among the military, but the citizens, male and female, ran down to the wharves, and every one was in a state of excitement. The city of Petersburg is used only as a temporary stopping place, and not more than six hundred soldiers are there at one time.

Norfolk our informant believes to be impregnable. The guns, to the number of seven hundred, have been mounted at different batteries, and wherever it is believed an attack would be made, has been well fortified. At the Hospital Camp four of the largest guns, one of 10 inch caliber, the invention of General Hunger, have been mounted. Hunger's gun is said to have thrown a distance of four miles beyond the horizon.

There are at least 50,000 troops in and around Norfolk. It was reported there that the big gun at the Rip Rap had been silenced by a cannon. A "Swallow's Point" "The kid glove" gentry of the South, he says, have accomplished wonders in throwing down the Rebel.

The Merrimack, Germantown, and one other vessel, have been raised, and a large force of mechanics are at work on each, preparing them for service.

Our informant states that the Rebel leaders have fully determined to make an attack upon Fort Monroe, and have collected a large force of troops, and are now in the process of constructing a line of fortifications, many of which formerly belonged to the Hook and Ladder Companies of Baltimore. Floating batteries, made of the Merrimack, Germantown, and one other vessel, have been raised, and a large force of mechanics are at work on each, preparing them for service.
